Personal Information

Many people share their personal information online and don't even notice who sees their personal information. 27 million Germans put personal information online and photos because they don´t know how to stay safe online . Your personal information is your location, age, address,full name, phone number, school name, how you look like and password. BBC says that 140 million people are signed up on twitter and many of them put personal information into the public and so than they got jailed . FTC says that the Rock You Game site got 179,000 of children's email addresses and dates of birth during the registration. Many hackers then accessed 32 million users personal information. **Stop Cyber bullying** says that the more we use google the more personal information is posted online. **Netzsmartz** says that 9 million people have their personal information stolen each year. Hackers use your personal information to contact you or pretend to be you. Think before you post or share personal information to avoid some of these issues already going on.

Passwords

To create your passwords you need to include numbers, letters, punctuation and upper and lower case. All of these tips should be mixed for example 6789.lOf. If you need some help with creating a password you can use the beginning letters of a sentence for example: I love Dogs and cats can be ilDac6748. Some common passwords are Password, 123456, blink182, 12345678, 696969, michael, football, batman, first name, abc123, myspace1 and password1.If your password is one of these than hackers could guess it in 4-5 seconds. Hackers could also be your friends if they know you well on what your hobbies are, favorite band is or your favorite restaurants. You should change your password every 6 months so hackers can not get access to your account. You should also have different passwords for different accounts.Your Password should be private but you can only tell your password to your parent so they could help in case of a emergency.

Usernames

Your username should always be your nickname but not your real name for example: If Lolas name is lola and here nickname is Loly, She would use Loly instead of Lola. Your Username can also

include Numbers & Letters with your nickname for example Lolas nickname is Loly so she could also use Loly3453. In your username it should not have your real age and in which street and country you live in.You Can also make an invented name with numbers for

 example: lollypop3464.

Email Addresses

Making emails you should not have your name birthday/date

e.g. If there was someone called Sarah McLain and she was born on the 3rd

December 2001 and she had her email sarah.mclain@20013dec@mail.com it would be bad because she put her name, birthday and birthdate and you should not have you name birthday/date.

Spam

Spam is junk mail and it is from people you do not know. Sometimes if you do not have the person as a contact, it goes to in spam so be careful that you always put your friends in your contact list. You should never open a spam if you do not know the person who sent it . Spam can bring virus to your computer and send bad things.

6.6 Downloading

Internet Downloading. Photography. Encyclopedia Britannica Image Quest. Web. 30 Apr 2012.
http://quest.eb.com/images/132_1304660

Downloading is the same as searching don't look up rude/mean apps because some people make rude apps that should be banned because when kids are on their iPads or iPhones they type things in then find these rude applications.Be careful in downloading files some files could have viruses which could affect your computer. To get rid of viruses download an anti virus software.

Cyber bullying

Cyber bullying hurts people. Like face to face bullying cyber bullying is bad.
Harassment online is more likely to be a crime than face to face bullying, but face to face bullying can be a crime too. Here's is one crime that happened.
A girl called Megan Meier killed herself because of cyber bullying .
Source:
." Megan Meier Foundation. Web. 26 Apr. 2012. <http://www.meganmeierfoundation.org/>.

Internet Chat Room. Photography. *Encyclopædia Britan-nica Image Quest.* Web. 2 May 2012.
http://quest.eb.com/images/132_1310982

A lot of criminals search for your personal Information online. They look for your addresses, date of birth and name. Never go alone to meet someone you do not know, always take someone with you because something could happen and a friend or adult can protect you from any bad things.
Chatting online can be fun but sometimes people call you names like duck face and cow mouth. They can post information about you and make you feel bad. It is very dangerous to chat with people you do not know even if you know that you should not share your personal information you still do it. This is some of the personal information you
Should not share.

Email address
Phone number
The school you go to

If you met someone on the Internet that did not cyber bully you and you
What two meet them never go alone to meet them. Like face to face bulling cyber bullying is the same and hurts people a lot.This is what you could do to not feel bad after cyber bullying. Go on chats in a family room so if you get cyber bullled they can make you feel better and say that what the person said is wrong.

Questions to the video

Question 1 of 3

How did Taylor feel after someone hacked her account on clickster?

- ○ **A.** Bad
- ○ **B.** Happy
- ✓ **C.** Sad
- ○ **D.** excited

◄   Check Answer   ►

 iBooks Author

Social Media

On facebook people bully others and they commit to bullycide because when people bully them they get so angry or sad and they actually feel the need to commit suicide. The account of people who have actually that is loads of people. When you type in bullycide on images on google you will find loads of poeple and pictures of people holding signs that say STOP CYBERBULLYING!
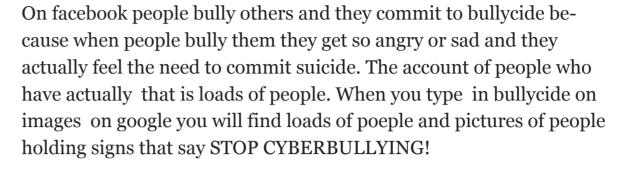

On twitter people tweet things like I will riot at …. then they get arrested and/or fined.

Some people go into other users Facebook's, and they send mean messages to the contacts and sign it with the senders name that percan and get in trouble and then that person may not have friends and they get sad for doing nothing wrong.
